Regular reserve (millions).....	\$75.8	\$62.3	\$13.5	21.6

FOREWORD

It is extremely gratifying to note the progress made by Federal credit unions during the past twelve months—progress that has been maintained in the face of generally unfavorable economic conditions that have entailed severe losses of earnings to the members in some areas. Credit union officials, too, have been confronted with equally trying problems, and they have done well.

Reserves are building up at an accelerated pace, and, in many credit unions, the officials have reexamined their lending and collection policies in the light of prevailing conditions. This is a healthy sign. Credit unions cannot afford to bask in the sunshine of a *laissez-faire* existence—they are dynamic organizations just as our economy is a dynamic one, and must be prepared at all times to adjust to changing conditions.

We can all look forward, I believe, to even greater expansion of credit union operations, and to ever-widening opportunities to provide credit union services to those segments of the population that do not now enjoy such services.

J. DEANE GANNON,

FEDERAL CREDIT UNIONS

Federal credit unions are cooperative associations organized in accordance with the Federal Credit Union Act "to promote thrift among their members and create a source of credit for provident and productive purposes." Membership is limited to a group of persons having a common bond of association, occupation, or residence. Federal credit unions are chartered, examined, and supervised by the Bureau of Federal Credit Unions. Members' shareholdings are not insured by any agency of the Government.

Two milestones in Federal credit union operations were passed in 1958—assets exceeded \$2 billion for the first time, and active membership passed the 5-million mark.

The year 1958 was characterized by a continuation of the adverse economic conditions that prevailed during the last half of 1957. Though employment picked up in the last few months of 1958, and business conditions improved generally, some industries experienced depressed production activity throughout the entire year, and unemployment remained spotty at the yearend. Automobile production, mining, and textiles in some areas, were examples of industries that were particularly affected.

The effect of economic conditions on credit union operations was twofold. Prolonged layoffs

resulted in increasing loan delinquency and a slowdown in saving on the one hand, while credit union officials reappraised their lending and collection policies, and at the same time provided additional protection for the members' savings through stepped-up transfers of surplus funds to reserves.

On balance, new borrowings in 1958 increased only 7.3 percent over the amount of loans made in 1957 in contrast to a 19-percent rise from 1956 to 1957; members' shareholdings stood 14-percent above the 1957 level in contrast to a 16-percent rise a year earlier and a 20-percent increase in 1956. Reserves, on the other hand, continued to build up, and, by the end of 1958, regular and special reserves had increased 23 percent over the level a year earlier; in the 3-year period since the end of 1955, in fact, reserves set aside to protect members' savings in Federal credit unions have more than doubled (up 103 percent) while members' shareholdings in the same period have increased 60 percent.

There were no amendments to the Federal Credit Union Act in 1958.

TABLE 1.—Selected data on Federal credit union operations, as of December 31, for each year 1935-58¹

Year	Number of operating Federal credit unions	Number of members	Assets	Shares	Loans outstanding
1935.....	772	119,420	\$2,372,100	\$2,228,400	\$1,834,200

¹ Data for 1935-44 on membership, assets, shares, and loans outstanding are partly estimated.

NUMBER OF FEDERAL CREDIT UNIONS

New charters.—The decline in chartering activity that began in 1955 continued into 1958, when the number of new Federal charters fell 11½ percent below the number issued in 1957. The 586 charters issued in 1958 represented the smallest number issued in any one year since 1951. (See table 3.)

Despite the decline in new chartering activity, however, 19 States recorded an increase over 1957 in new charters issued. All four leading States in number of new charters—California, New York, Pennsylvania, and Texas—registered declines in this activity in 1958, and, as a result, their share of new charters fell from 44 percent of the total number issued in 1957 to 40.6 percent of the 1958 total. (See table 25.)

Associational and residential groups received a larger share of the new Federal charters in 1958,

and occupational groups received a smaller proportion of the total. Three of the four associational groups recorded increases, and the category as a whole received 20.8 percent of the new charters issued in 1958 as compared with 16.6 percent of the total in 1957. The community groups' share of the total went up from 1.7 percent in 1957 to 2.1 percent in 1958. Occupational groups, on the other hand, received 77 percent of the charters issued in 1958 in contrast to 82 percent of the total a year earlier.

Religious groups led the way in the number of new charters issued in 1958 with 43, and were closely followed by "labor unions" with 41 and "Federal Government" with 40. Of these 3 groups, however, only "labor unions" received more new charters in 1958 than in 1957. In all, 19 of the 49 type categories registered gains in new charters in 1958. (See table 26.)

Liquidations.—Just as unfavorable business conditions tend to force the marginal producer into liquidation, such conditions are very likely to exert an adverse influence on credit union operations for two reasons: (1) when the parent company finds itself in financial difficulties, it may withdraw its support from the credit union; and (2) the credit union itself, if poorly managed, may find itself in difficulty as the result of unsound lending policies and lax collection procedures.

A downward trend in liquidations was reversed in 1957 when the number of charter cancellations increased 6.6 percent over the number a year earlier. The full impact of the unfavorable economic conditions then prevailing had not yet been felt by the credit unions, however. In 1958, charter cancellations increased nearly a third (31.4 percent) over the number in 1957, and totaled 255 for the year.

Revocation of the charters of 19 groups that did not commence business, mergers of 6 groups with other Federal credit unions, and conversion of 5 groups from a Federal to a State charter accounted for 30 of the 255 cancellations in 1958. Of the remaining 225 Federal credit unions that completed liquidation in 1958, a total of 155 returned to their members full payment of their shares, while 88 of these groups paid, in addition, a liquidating dividend on the members' shareholdings. The remaining 70 credit unions liquidated at some loss to the membership—the members of these credit unions absorbed a loss of \$8.54, on the average. In the 88 credit unions that paid a dividend at liquidation, the return to the members averaged \$10.30 over and above the full return of the members' shareholdings. (See table 2.)

Liquidations continue to occur more frequently among the smaller credit unions. These are the groups that have, for the most part, been in operation for only a relatively short time. These groups, moreover, are vulnerable because of their lack of size and experience in credit union operations, and are particularly susceptible to difficul-

TABLE 2.—Liquidation of Federal credit unions, 1935-58

Item	Liquidations completed		
	1935-58	1957	1958
Number of Federal credit unions.....	2,858	172	225
Paid 100 percent or more.....	2,248	140	155
Paid less than 100 percent.....	610	32	70
Number of members.....	299,190	21,864	25,945

Received less than 100 percent.....	58,136	4,515	7,153
Amount of shares.....	\$23,595,406	\$3,903,225	\$3,277,072
Repaid 100 percent or more ¹	\$20,932,648	\$3,165,194	\$2,923,341
Repaid less than 100 percent ²	\$2,662,758	\$738,031	\$353,731

¹ In addition, dividends were paid on some of these shares as follows: 1935-58, \$1,175,557; 1957, \$204,435; 1958, \$181,947.

² The losses on these shares were as follows: 1935-58, \$602,304; 1957, \$360,258; 1958, \$61,069.

ties induced by declining or generally unfavorable economic conditions. Eighty-six percent of the credit unions that completed liquidation in 1958 held shares that amounted to less than \$25,000 in the aggregate, and they had 64 percent of the membership of all credit unions that completed liquidation during the year. These smaller credit unions had 86 members, on the average, and shareholdings averaged \$5,446.

Among the 225 Federal credit unions that completed liquidation in 1958, membership averaged 115 and shares amounted to \$126 for each member, on the average; in contrast, membership among all Federal credit unions in operation at the end of 1958 averaged 577, and shareholdings averaged \$348 per member.

Number operating.—With a net increase of 295 operating groups, the smallest annual gain since 1948, there were 9,030 Federal credit unions in operation at the end of 1958. The rate of in-

1958.....	586	255	331	9,533	503	9,030

¹ Includes 78 charters issued in 1934.

crease—3.4 percent—fell below the 1957 increase (4.6 percent), and was less than half the rate of gain in 1956 (7 percent).

Increases occurred in 36 of the 54 jurisdictions, and in 34 of the 49 type-of-membership categories, while declines were registered in 9 States and in 5 type classes. Texas led the States with a gain of 51 operating units in 1958, and was followed by Pennsylvania and California with increases of 37 and 26, respectively. Religious organizations recorded the sharpest absolute gain among the type-of-membership categories with an increase of 39 operating units; elementary and secondary school groups followed with a gain of 31, and Federal Government employee groups recorded a net gain of 24. Although comprising the largest single category among the 49 type-of-membership groups, the "Federal Government" group accounts for less than 10 percent of the total number of operating Federal credit unions—9.8 percent in 1958.

MEMBERSHIP

Membership in Federal credit unions passed the 5-million mark for the first time in 1958, and stood at 5,210,000 at the yearend. The gain of 312,000 (6.4 percent) during 1958 was somewhat below last year's increase (8.8 percent), but active participation as measured by the ratio of actual to potential membership went up from 50.1 percent in 1957 to 51.3 percent a year later.

All but 3 States—Connecticut, Vermont, and Wisconsin—participated in the rise in membership. Increases ranged as high as 42 percent in New Hampshire and 33 percent in Puerto Rico; other notable increases occurred in Arizona, Arkansas, and New Mexico.

Active membership rose 9 percent for the associational groups as a whole, and increased 11 percent for the community groups. The increase for the important occupational group, which accounts for 89 percent of the total membership, was 6 percent, which was slightly below the national rate of 6.4 percent.

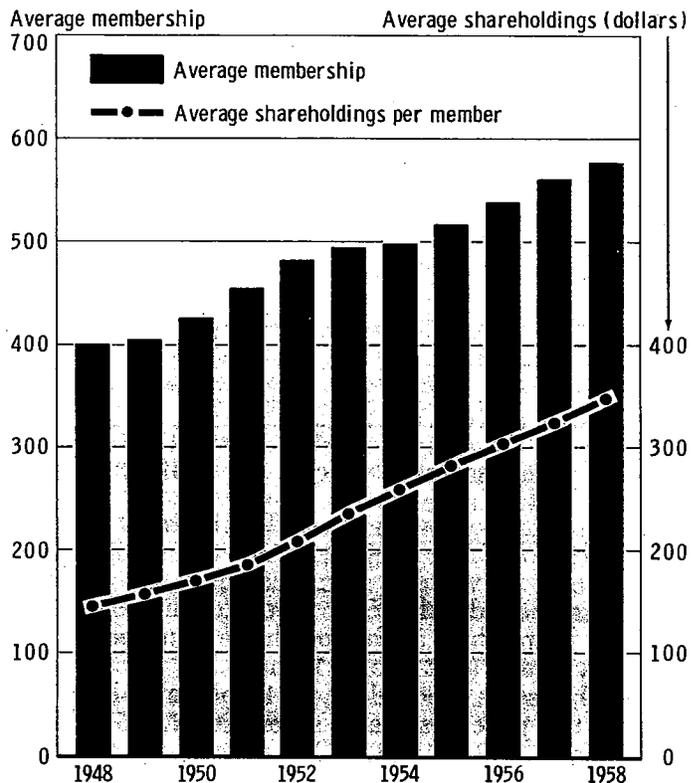

The average number of active members per credit union—577 in 1958 as compared with 561 in 1957—continues to increase as the credit unions grow. (See chart A.) In 1958, the number exceeded the national average in all asset size groups of \$250,000 or more, in 15 of the 54 jurisdictions, and in 15 of the 49 type-of-membership groups. (See tables 22 and 24.)

In 30 States and in 40 type-of-membership groups, at least half of those eligible for membership in a Federal credit union were active members at the end of 1958. (See tables 21 and 23.)

The ratio of actual to potential membership ranged from 14 percent among the smallest credit unions to 70 percent for those with assets of \$2.0-\$4.9 million; membership participation dropped off to 48 percent for the largest credit unions (those with assets of \$5 million or more),

CHART A

AVERAGE MEMBERSHIP PER FEDERAL CREDIT UNION AND AVERAGE SHAREHOLDINGS PER MEMBER, DECEMBER 31, 1948-58

primarily as a result of their very large potential membership.

SIZE OF FEDERAL CREDIT UNIONS

Although the rise in assets was dampened in 1958, for the second year in succession, by economic conditions, Federal credit unions continued to grow. Median assets moved up from \$70,690 on December 31, 1957, to \$76,760 at the end of 1958. Assets in one-half the Federal credit unions in operation at the end of 1958, therefore, exceeded \$76,760, while assets in half the credit unions were less than this amount.

Credit unions in the two smallest asset size categories shown in table 4 continue to make up a declining share of the total number in operation, while those in the \$100,000 and over size groups continue to bulk proportionately larger. Where 13.8 percent of the credit unions had assets of less than \$10,000 at the end of 1957, 13.1 percent of the credit unions were in this group at the end of 1958; the proportion likewise declined for credit unions in the \$10,000-\$99,999 asset group from 45.9 percent in 1957 to 44.6 percent a year later. Credit unions with assets of \$100,000 or more, on the other hand, moved up from 40.3 percent of the total in 1957 to 42.3 percent in 1958. In 1958, for the first time, more than 1 in 10 Federal credit

TABLE 4.—Percentage distribution of all operating Federal credit unions, by amount of assets, for each year 1945-58¹

¹ Based on data for all Federal credit unions in operation as of December 31. For data for 1935-44 (based on number of Federal credit unions reporting), see 1955 *Report of Operations*, table 3, p. 4.

unions had assets in excess of half a million dollars. (See table 4.)

ASSETS

Assets in Federal credit unions, which now aggregate more than \$2 billion, have doubled in the past 4 years. (See tables 1 and 5.)

Total assets recorded a 14-percent increase during the past year, and stood at \$2,035 million on December 31, 1958. The absolute increase—\$246.1 million—was only 5 percent less than the dollar gain in 1957—\$259.6 million.

Forty percent of the assets were held by the million-dollar credit unions, which accounted for only 4.4 percent of the total number in operation at the end of 1958. At the other extreme, 57.7 percent of the credit unions (those with assets of less than \$100,000) held only 9 percent of the assets.

Six States—California, Michigan, New York, Ohio, Pennsylvania, and Texas—with 48 percent of the operating credit unions, account for 52 percent of total assets; of these 6 States, California, with slightly more than 10 percent of all active groups, accounted for nearly 15 percent of total assets at the end of 1958. (See table 9.)

Occupational groups accounted for 91 percent of total assets, associational groups for somewhat less than 8 percent, and community groups for about 1 percent of the total in 1958. Credit unions serving employees of Federal, State, or local government agencies accounted for nearly one-fifth of all assets in 1958, but made up less than one-sixth (15.6 percent) of the total number of credit unions in operation. (See table 11.)

All States except Wisconsin participated in the rise in assets in 1958, with increases ranging up to 39 percent in New Hampshire. The national increase was dampened by below-average gains in several of the large industrial States that felt the full impact of the adverse economic conditions

that prevailed throughout most of the year. Of the 6 States that account for more than half the assets of all Federal credit unions, only California and Texas recorded increases in excess of the national rate of increase in 1958. (See table 10.)

Small increases in “automotive products” and “machine manufacturers” may be attributed to the unfavorable conditions that prevailed in those industries during most of the year. In the important “Federal Government” group, by contrast, assets increased 28.8 percent, or more than twice the national rate of 13.8 percent. (See table 12.)

Loans outstanding.—The severe and prolonged layoffs that prevailed in many industries during 1958 resulted in a declining demand for new loans, and at the same time resulted in increasing delinquency in repayment of existing loans as many of the members experienced difficulty in making scheduled repayments. New borrowings increased only 7.3 percent in 1958 in contrast to a 19-percent rise from 1956 to 1957. At the end of 1958, loans outstanding to members were only 9.7 percent above the level a year earlier, in contrast to a 13.8 percent increase for assets as a whole, and as a result, outstanding loans accounted for only 67.8 percent of total assets at the end of 1958 as against 70.3 percent of the total at the end of 1957. (See table 5.)

Investments.—The declining demand for loans in 1958 resulted in a reversal of the trend in investment of members’ shareholdings. As indicated in last year’s report, the proportion of total assets available for investment purposes has declined since 1954 as loans to members have increased. In 1958, however, credit unions were again faced with the problem of investing their surplus funds as loan demand fell off, and, by the yearend, 23.5 percent of the credit unions’ total assets were invested in the three sources available—Federal Government bonds, insured savings and loan shares, and loans to other credit unions—in contrast to 21.3 percent at the end of 1957.

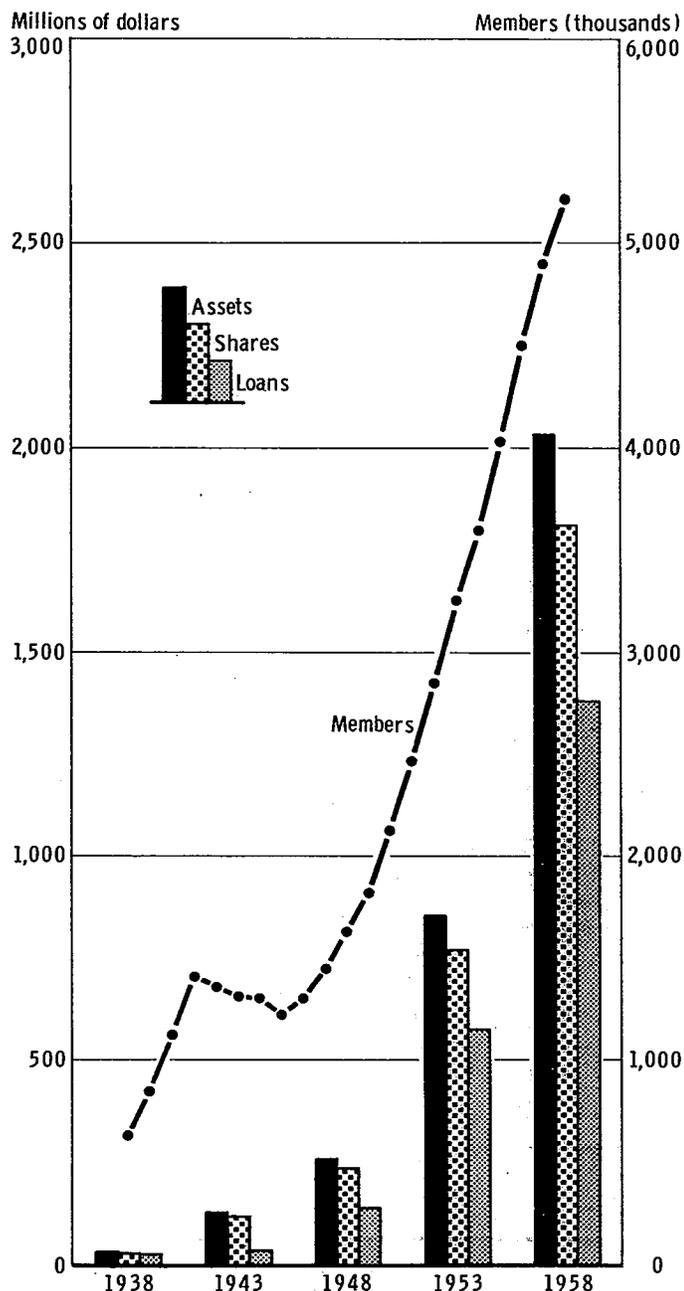

Total investments amounted to \$477.4 million in 1958, an increase of 25.2 percent over the amount a year earlier; assets as a whole, by contrast, increased less than 14 percent. The percentage distribution of total investments among the three types is shown below for 1957 and 1958 for comparative purposes:

Type of Investment	As of December 31—	
	1958	1957
Total investments.....	100.0	100.0
United States bonds.....	19.9	23.8
Savings and loan shares.....	72.8	66.0
Loans to other credit unions.....	7.3	10.2

The data in table 5 reveal the increasing importance of insured savings and loan shares and the decreasing importance of United States bonds

CHART B

ASSETS, SHARES, LOANS, AND MEMBERSHIP IN OPERATING FEDERAL CREDIT UNIONS, END OF SPECIFIED YEARS, 1938-58

and loans to other credit unions in relation to total assets. The relative position of these three types of investment is depicted even more clearly by the above distributions, which are based on total investments in 1957 and 1958. Where 24 cents of the credit unions' investment dollar had gone into Federal Government bonds by the end of 1957, less than 20 cents was invested in this source a year later; loans to other credit unions likewise received a smaller share of the investment dollar—7 cents in 1958 in contrast to 10 cents a

year earlier. Insured savings and loan shares, on the other hand, accounted for nearly 73 cents of every dollar invested by Federal credit unions at the end of 1958, where, a year earlier, 66 cents of every dollar invested went to this investment source.

The remaining assets in Federal credit unions consist primarily of cash on hand or in banks—about 7½ percent of all assets—and, in addition, relatively small amounts—about 1 percent of the total—in land and buildings and other assets.

The major categories of Federal credit union assets, by State, size, and type-of-membership, are shown in tables 9 and 11.

LIABILITIES

Shares.—Members' savings normally account for about 90 percent of the total liabilities of Federal credit unions, and represent the principal source of funds available to the credit unions for lending purposes. With a 14-percent increase in 1958, representing an absolute gain of \$222.8 million, shareholdings moved up to \$1.8 billion at the yearend. This increase, coupled with a sharp decline in demand for loans, resulted in a buildup of surplus funds that were channeled, principally, into shares of insured savings and loan associations, as has been noted previously.

TABLE 5.—Assets and liabilities of Federal credit unions, Dec. 31, 1958, and Dec. 31, 1957

Assets and liabilities	Amount			Per-centage distribution

Undivided earnings.....	93,922,039	84,467,436	9,454,603	4.6	4.7

¹ Reserve for contingencies and special reserve for losses.

Reserves.—Confronted with increasing loan delinquency in 1958, officials of many credit unions continued to build up their reserves to protect the members' savings. Regular and special reserves increased 23 percent in 1958 as shareholdings rose 14 percent, and in the past two years,

reserves have increased more than a half in contrast to a gain of about a third for shareholdings. At the end of 1956, reserves amounted to \$53.8 million, or 3.9 percent of savings; on December 31, 1958, reserves amounted to \$84.3 million, or 4.7 percent of shares.

While the regular reserve increased 21.6 percent during the past year, special reserves for delinquent loans rose 24.6 percent, and "other reserves" went up 53 percent. These "other reserves" consist of a Reserve for Contingencies, which may be established at the discretion of the credit union's board of directors, and a Special Reserve for Losses, which may be ordered by the Director. Of the \$3,881,182 in "other reserves" at the end of 1958, \$753,627 represented such special reserves for losses.

Notes payable.—After an uninterrupted rise since 1954, credit unions reduced their obligations in the form of notes payable by \$3.8 million, or 9.2 percent, during 1958. In normal times, when loan demand exceeds available shareholdings, credit unions may borrow to satisfy at least some of the demand. Declining demand for loans in 1958, however, obviated the need for outside borrowing in many cases. As a consequence, notes payable represented only 1.8 percent of the credit unions' total liabilities in 1958; a year earlier, this item made up 2.3 percent of the credit unions' total liabilities.

Undivided earnings.—An increase of 11.2 percent brought cumulative undivided earnings before payment of dividends to \$93.9 million at the end of 1958. Undistributed earnings after dividends amounted to approximately \$27 million, or about 1½ percent of shareholdings at the yearend. This represents a net overall figure, however, since losses in some credit unions reduce the gains among the other groups.

Other liabilities.—Accounts payable and other miscellaneous liabilities of Federal credit unions represent an insignificant proportion—¾ of 1 percent in 1958—of their total liabilities. Social security and withholding taxes payable make up the bulk of this item, which amounted to \$7.2 million in 1958.

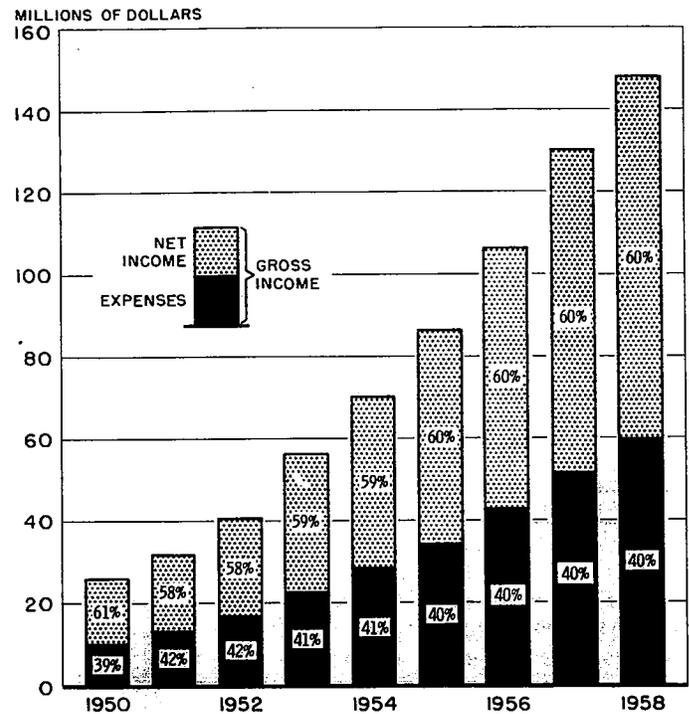

INCOME AND EXPENSES

Since the bulk of the credit unions' income is derived from interest earned on loans to the members, the declining demand for loans exerted a dampening effect on income. After a \$24-million rise (22.4 percent) in 1957, gross income increased by only \$18 million (13.8 percent) in 1958, and totaled \$148 million for the year. Total expenses amounted to almost \$60 million in 1958, an increase of 15½ percent over the total a year earlier. With expenses rising at a faster rate than income, the ratio of net to gross income fell from 60.1 percent in 1957 to 59.6 percent in 1958. (See table 6 and chart C.)

The below-average increase in interest income—13.2 percent—was offset to some extent by a gain

CHART C

INCOME AND EXPENSES OF FEDERAL CREDIT UNIONS 1950-58

of 18½ percent in "income from investments" and a rise of 43 percent in "other income," but these latter two items together account for only about one-tenth of the gross income of Federal credit unions.

Sharpest relative increases among the major expense items occurred in payments for life-savings insurance, up 26 percent, and examination and supervision fees, up 23 percent. Since both of these items are based to a large extent on the size of the credit union, however, increases may be attributed to growth of the credit unions rather than to increases in rates. Premiums for life-savings insurance and examination and supervision fees accounted for only 8.2 percent and 4.6 percent,

TABLE 6.—Income and expenses of Federal credit unions, 1958 and 1957

Income and expenses	1958	1957	Change during year
Total income.....	\$148,027,150	\$130,070,858	\$17,956,292

Other expenses.....	9,754,991	8,273,896	1,481,095
Net income.....	88,153,586	78,224,326	9,929,260

respectively, of the credit unions' total expenses in 1958.

Salaries make up by far the largest expense item of credit unions as a whole, accounting for 47½ percent of total expenses in 1958. The next largest single item of expense—borrowers' protection insurance—accounts for less than 12 percent of all expenses. The rate of increase for both of these items was less than that for expenses as a whole.

Reflecting the decrease in notes payable, mentioned previously, interest on borrowed money declined in 1958. This was the only major expense item to fall below the 1957 level.

Breakdowns of the major income and expense items, by size, State, and type-of-membership groups, appear in tables 13-16.

DIVIDENDS AND INTEREST REFUNDS

Dividends.—A total of 8,000 Federal credit unions paid out early in 1959 more than \$63 million in dividends to their members. While this represented an increase over the past year of only 3.7 percent in the number of credit unions that paid a dividend, the amount disbursed increased 16.8 percent.

TABLE 7.—Federal credit unions grouped according to rate of dividends paid January 1959 and January 1958

Rate of dividend	January 1959		January 1958	
	Number	Percent	Number	Percent
All Federal credit unions....	9,030	100.0	8,735	100.0
Credit unions paying no dividend.....	1,030	11.4	1,023	11.7
Credit unions paying dividend, total.....	8,000	88.6	7,712	88.3
Less than 1 percent.....	0		2	(1)
1 to 1.9 percent.....	78	.9	71	.8
2 to 2.9 percent.....	393	4.4	338	3.9
3 to 3.9 percent.....	2,095	23.2	2,097	24.0

6 percent.....	488	5.4	508	5.8

¹ Less than 0.05 percent.

The rate of dividend declared in 1959 was slightly higher than a year ago. The median rate for all credit unions was 4.255 in 1959 compared with 4.245 in 1958. The percentage of credit unions that paid a dividend of 4 percent or better increased fractionally from 59.6 in 1958 to 60.1 a year later.

Interest refunds.—Data were collected last year for the first time on refunds of interest to borrowing members of Federal credit unions. Though authorized by a 1954 amendment to the Federal

Credit Union Act, interest refunds are still small in relation to dividends; refunds may be expected to increase, however, as boards of directors in additional credit unions authorize such payments.

Where in 1959 about 88½ percent of the operating credit unions paid a dividend to their members on 1958 shareholdings, 15½ percent of the credit unions returned a portion of the interest paid by the borrowers during 1958. Among those paying an interest refund, the 10-percent rate was the most frequent.

TABLE 8.—Federal credit unions grouped according to rate of interest refund to borrowers, 1958 and 1957

OPERATING RATIOS

The various ratios and averages pertaining to Federal credit union operations, shown last year in tables 20 and 21, are presented this year in four tables. (Tables 21-24.) The selected averages, by size and State and by type-of-membership groupings, are also presented this year expressed as a percentage of the national average for all Federal credit unions. (See tables 22 and 24.) These additional calculations were added to facilitate comparisons among the different size, State, and type categories.

Increasing loan delinquency was accompanied by stepped-up increments to credit union reserves in 1958. In relation to total loans outstanding, delinquent loans increased from 4.5 percent at the end of 1957 to 5.1 percent a year later. Reserves set aside to protect the members' shareholdings moved up from 4.3 percent of shares in 1957 to 4.7 percent in 1958, and, in relation to loans outstanding at the yearend, reserves increased from 5.5 to 6.1 percent.

New loans continue to increase in size, on the average. Loans made in 1958 averaged \$535 in contrast to an average of \$516 a year earlier. Shareholdings also continue to move up; the average of \$348 per member in 1958 represents a gain of \$24, or 7.4 percent, over the 1957 average.
